CS 6140: Data Collection Report

Brian Kimmig, Jesus Zarate

1 How you obtained your data?

How you obtained your data?

2 Data Size

How large is your data?

3 Format/Storage

In what format are you storing your data. Describe the abstract data type, not just the file format.

4 Processing

Did you need to process the original data to get it into an easier, more compressed format (e.g., convert from one format to another one)?

5 Simulating Similar Data

How would you simulate similar data?
